Update 21th january 2016

Episciences
Webmaster guidelines

To perform all the actions listed below, an account on the Episciences platform is needed. This account must be validating after clicking a link send by e-mail by the CCSD.

You can rely on us to support you if unexpected problems occur:

- **episciences-support@inria.fr**

Introduction

The website layout can be adapted (either by the webmaster or the editor-in-chief) to create a journal-specific identity.

It is based on general drag and drop principles.

The first steps are:
1) Choose the language versions needed.
2) Create the home page, then the appropriate number of other pages (and subpages).
3) Customise the layout and the banner.
4) Choose the wished widgets.

General

The "General" tab sets the languages the interface will be displayed in – so far two possibilities: French and English.

Select the wished language(s) by clicking on them (click and press Ctrl to select the second language if a bilingual website is needed).
Don't forget to save the selected settings.

Style

The "Style" tab is the place where to work on the layout of the website.

Here you can choose:
- the menu orientation
- the width of the main zone
- to show the breadcrumb trail or not
- and the customisation type

There are three ways of customising the website's layout.

- by selecting the 1-click option, you will have the choice between two fixed models (colours, fonts and the rest are already defined).

Update 21th january 2016

Customisation type	1-Click
Modèles proposés	✓ Modèle 1
	Modèle 2

Save

- by selecting the simple option, you will be able to set yourself the colours (of the background and main zone), the colours, sizes and fonts of texts and headers.

Customisation type	Simple
Page background color	
Main zone background color	
Add a background image	No
Text font	Verdana, Geneva, sans-serif
Main text size	10 px
Text color	
Header font	Verdana, Geneva, sans-serif
Header size	10 px
Header color	
Link color	

Save

- by selecting the advanced option, you will be able to directly create your own CSS.

| Customisation type | Advanced |
| Feuille de styles | @CHARSET "UTF-8"; |

```
@CHARSET "UTF-8";

body {
    background-color: ;
    background-image: url(/public/);
    background-repeat: repeat;
    background-position: left top;
}

a {
    color: ;
}

h1, h2, h3 {
    font-family: Verdana, Geneva, sans-serif;
```

Save

Header

The "Header" tab is the place where to upload / enter images and text that will appear in the banner of the website.

Click the "add a logo" button. If you want to enter text in the banner, select text in the drop down menu.

You will be able to enter the wished bit of text, choose its style by selecting the CSS class(es) and style(s) and decide on its alignment.

If you want to upload an image, select image in the drop down menu.

Update 21ᵗʰ january 2016

Header

Customize the website banner

+ Add a logo

Logo		Actions
⊕ A - épijinfo (preprod revue)		✏ 🗑

* *Required fields*

Type	Image ▾
File *	⬆ Upload...
Largeur	
Hauteur	
Link	
Texte alternatif	
Alignment	Left ▾

Save

You will be able to upload the corresponding file, set its size, link it to a website through a hyperlink, enter some alternative text and choose the alignment of the image.

Menu

The "Menu" tab is the place where pages of the website are created, managed and deleted.

There are currently nine types of pages:
- homepage (1,1)
- customised page (0,*)
- news page (0,1)
- link (0,*) -> to create a tab linking to an external page
- file (0,*) -> to display a document in the browser rather than attach it to the webpage
- browse pages (by author, by date, by volume, by section, latest articles) which allows to browse articles published by the journal
- search page
- RSS Feed
- Editorial staff members

You can either create a page or a folder (in which several pages can be gathered).
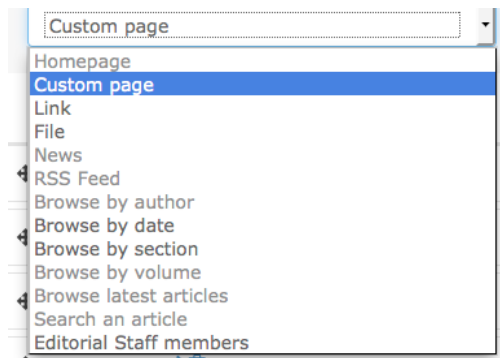

To create a page, select its type in the drop down menu and click the "add page" button.

A title for the page is required, as well as permalink. This is the suffix that will appear in the URL.
If you enter "contact" in the permalink field, the address of the page will be nameofthejournal.episciences.org/contact
You will also have to decide if the page is public or only visible to connected users.

To create a folder, simple click the "add folder" button.

A page's title and the visibility criterion are required to create a folder.

Edit a page's content

To edit a page's content, go to the page and click the "edit content page" button.

Update 21th january 2016

Home

Welcome to EpijiInfo, the sand box of Episciences IAM (Informatics and Applied Mathematics). \o/

✎ Edit content page ✕
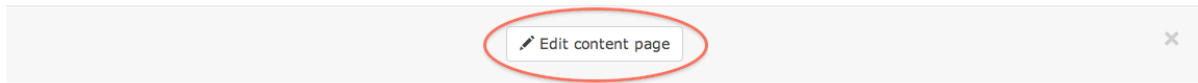

If there is no text on the page yet, a textbox opens automatically. If there is already some text on the page, an intermediary page opens.

Home

Welcome to EpijiInfo, the sand box of Episciences IAM (Informatics and Applied Mathematics). \o/ (English) ✎ 🗑

submit
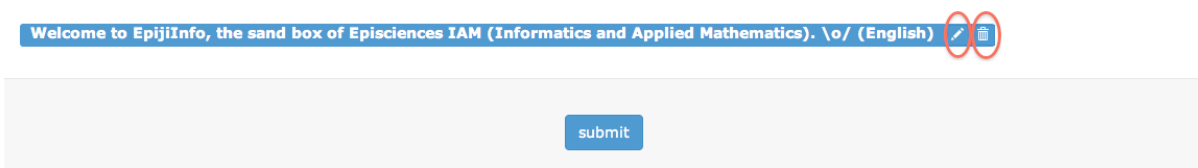

Click the bin icon to suppress the text; or the pencil icon to modify the text. If you click the pencil icon, the textbox opens with a text editor.

Welcome to EpijiInfo, the sand box of Episciences IAM (Informatics and Applied Mathematics). \o/

1. Validate

2. Submit

p

English ✔

submit
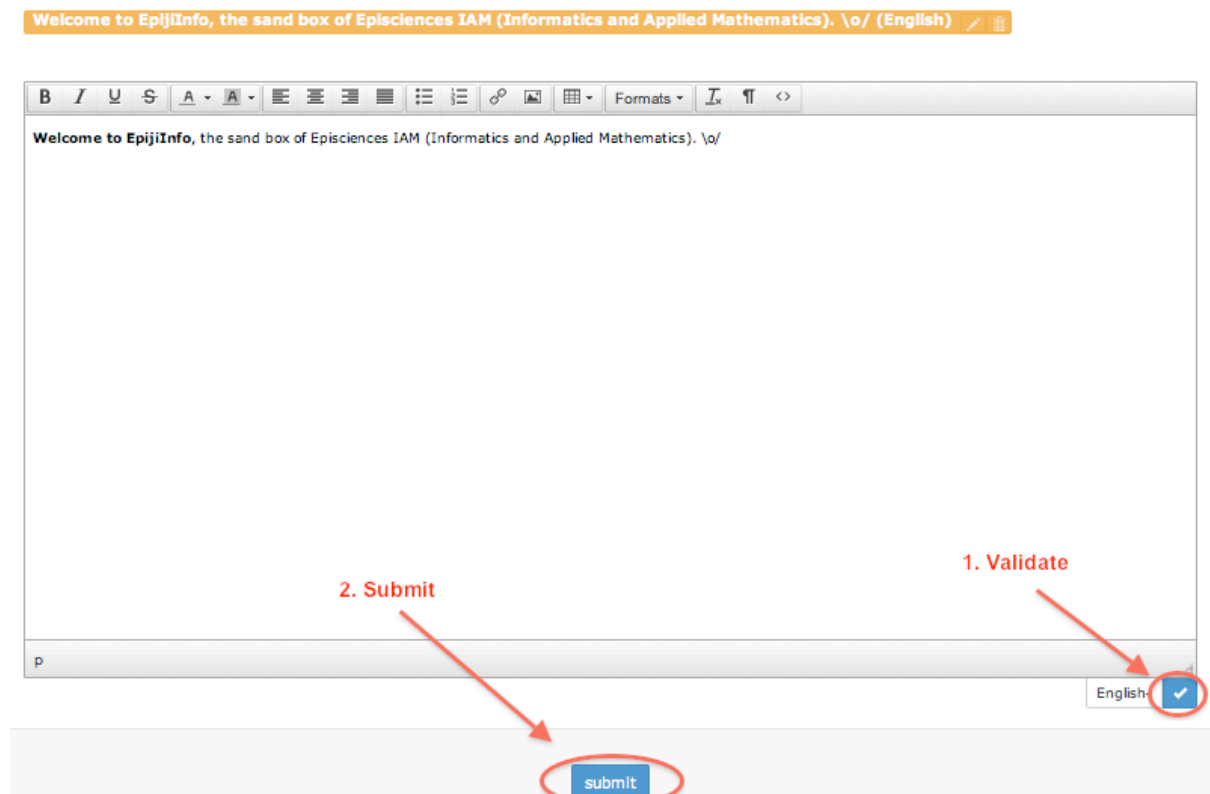

You will be able to enter some text and perform traditional editing tasks such as insert a table, a hyperlink, an image; create bullet points and lists; and choose appropriate formats for text chunks. By clicking the last tab on the right hand side, you will be able to directly edit the source code.

When you are finished editing, don't forget to validate the text by clicking the button at the bottom right corner of the textbox. If your website is bilingual, you will then have the possibility of editing the text in the second language.
After validating, click "submit" to save the modifications.

News

The "News" tab allows adding pieces of news to the News page.

Resources

The "Resources" tab is the location where all resources of the website (files, images, etc.) are stored and can be accessed.

RSS Feed

RSS feed can be added as a web page or as a clickable icon embedded in another page which already exists:
Journal Management > Website > Menu
- To create a RSS Feed webpage : choose RSS Feed in the box and clic on the"add page button"
- Links to the same page can be created from any age of the site, without needing to create a page in the menu RSS :
    - In the edit field of the contents of a page, insert an RSS icon or text to serve as a link
    - Select
    - Click on the toolbar on "Insert Link" (icon links chain)

    - Select
    - Click on the toolbar on "Insert Link"
    - In the URL field, enter "/ rss / papers"
    - Confirm
    - Register

NB : By default, the flow returns the last 20 items. It is possible to change the number of results by adding a parameter "max" on page (example: / rss / max = 50 papers or / rss / papers / max / 50?).
